

Homework

L3 NIT

Tr . N. Eraste

Scenario:

A small office in Kigali has just moved into a new building. The manager wants all employees to **share files, access the internet, and print documents** from different computers. As a **network technician**, you are asked to identify the **network components** required and explain their roles in the network setup.

Questions

- a) Identify **five (5) network components** that would be required in this office network.
- b) Explain the **function of each identified component**.
- c) Which network component is responsible for **connecting the office network to the internet**?
- d) Which component is used to **connect multiple computers within the same local network**?
- e) Which component allows a computer to **send and receive data over the network**?
