

## **Homework**

### **L5 SOD**

#### **Tr . N. Eraste**

#### **Scenario:**

A secondary school plans to develop a **Student Management System (SMS)** to handle student registration, attendance, examination results, and fee payments. The system will be used by **students, teachers, school administrators, parents, and the school accountant**. Before development begins, the project team must identify and document **stakeholder requirements** to ensure the system meets everyone's needs.

#### **Questions**

- a) Who are the **stakeholders** in this project?
- b) What are **stakeholder requirements**?
- c) Identify **five (5) stakeholder requirements** for this system.
- d) Explain why **documenting stakeholder requirements** is important.
- e) What problems may occur if stakeholder requirements are **not clearly defined**?
