## WINDOWS SERVER ADMINISTRATION ASSIGNMENT

DATE:15/01/2026

---

You are the **IT administrator** of **Sunrise Hotel**.

The hotel has different departments and many computers connected to one **Windows Server** domain.

The departments are:

- **Reception**
- **Accounts**
- **Human Resources (HR)**
- **Management**

Each department has:

- Several **staff members (users)**
- **Client computers** that must join the hotel's **domain server**

The hotel wants:

- Staff to log in using **domain user accounts**
- Client computers to be **joined to the domain**
- Proper **security and access control**
- Easy management using **Active Directory Users and Computers (ADUC)**

---

### Questions

1. Using **ADUC**, which **Organizational Units (OUs)** would you create for Sunrise Hotel? Explain why OUs are important.
2. Which **ADUC objects** would you create for the hotel staff and computers?
3. How would you create **user accounts** for Reception and Accounts staff using ADUC?
4. Explain how you would **create security groups** and assign users to those groups for each department.
5. Describe the **steps to join a client computer** at the Reception desk to the **hotel domain server**.
6. Why is it better for hotel staff to log in using **domain accounts** instead of local accounts?
7. Mention two **daily activities** an administrator performs in ADUC to manage hotel users and computers.
